

I have been deaf all of my life, and only since 1993 have I been able to fully enjoy any TV programs because of close captioning. The CCs are extremely helpful to me, and I miss them when they don't show up at all on certainly cable channels--then it's not even worth it for me to watch that show. On the news and sports channels, I would like to see the CCs in a different spot from the open captions that sometimes appears on these channels, especially when the TV prints names of athletes or headlines on news channels. Please continue to mandate CCs! A grateful movie watcher thanks you very much!
